

## REQUEST FOR A HEREDITARY AAC DIAGNOSIS

**Enclose a hospitalisation report +++ and a copy of the MRI T2 or Flair hypersignal scans (CD ROM or film)**

**Ce document n'apparaîtra pas sur le site anglais car le chapitre Génétique/Angiopathies amyloïdes cérébrales héréditaires est supprimé**

Patient's surname:

Given name:

Maiden name:

Date of birth:

Age:

- ❖ **Clinical signs**: Enclose a hospitalisation and/or consultation report
  
- ❖ **MRI**: A copy of the MRI T1, T2, gradient echo and Flair hypersignal scans must be enclosed on either CD-Rom or conventional film.
  
- ❖ **Family tree** with indication of the surnames and given names of patients including maiden and married names. This can considerably accelerate reporting on an examination of patients belonging to a family already known to our laboratory.
